128. A method for making financial analysis output having a system-

determined purchase price for at least one component from property in consummating a sale through a financial exchange, the financial analysis output being made by steps including:

p1

converting input data, representing at least one component from property not including any securities, into input digital electrical signals representing the input data;

p1

providing a digital electrical computer system controlled by a processor electrically connected to receive said input digital electrical signals and electrically connected to an output means;

p1

controlling a digital electrical computer processor to manipulate electrical signals to compute a system-determined purchase price for the at least one component from property in consummating a sale and corresponding purchase of the component; and

p1

generating the financial analysis output at said output means.

II. REMARKS

The Examiner is requested to reconsider the application in view of the foregoing amendment. It is believed that the amendment adds no new matter.

For the convenience of the Examiner, it is noted that claims 123-127 are dependent claims, and claim 128 is similar to claim 97.

III. CONCLUSION

The application, as amended, is believed to be in condition for allowance, and favorable action is requested. Applicant and the undersigned wish to express their appreciation to the Examiner for the excellent focus and effort in the examination.

The Commissioner is hereby authorized to charge any fees associated with the above-identified patent application or credit any overcharges to Deposit Account No. 50-0235.
